

# INCREDIBLE

It's what players say the first time they see Konami/Centuri's *Badlands™*. It's what you'll say the first time you look at the cashbox.

*Badlands™* is not the world's first laser disc game, and it probably won't be the last, but it will be one of the best.

While the graphics and play theme are simply sensational, player interaction and response is second to none. This means you get raster quality play with laser quality graphics.

You also won't have to break your bank to bank a few *Badlands™*. We understand how competitive our business

has become, and we've priced *Badlands™* so that you can remain in the game.

For more information about Konami/Centuri's *Badlands™* contact your authorized Centuri distributor.

Konami/Centuri.

 **BADLANDS™**
